

Gig Economy

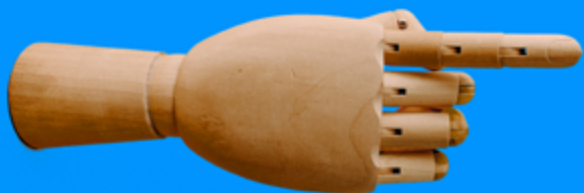

Paying in real-time

Some of the world's largest merchants live in the booming Gig Economy. This allows consumers and businesses alike to utilize products and services such as contractors, rideshares, groceries, and dinner with ease - often delivered right to their front door. Due to the growing demand in the market, this list continues to grow daily while consumers and businesses enter the space in droves.

PayCertify, the parent company of ProfitPay, created this platform for the online travel industry so they could seamlessly pay airlines and hotels in real-time on behalf of the consumers purchasing on their websites. **Now, this capability is being extended across all industries while earning up to 2% cashback on every transaction, reducing your processing fees to as low as 0%.**

A cutting edge technology.

We take the payment on the frontend of a transaction and pay the supplier by pushing it directly into their account, providing an instant virtual Visa or MasterCard, or invoke settlement at the end of the day's transactions. **Not only will gig economy merchants become highly profitable with ProfitPay, but they are also able to pay vendors, suppliers, and manage hundreds of paid media campaigns all through our API and virtual interface.**

PayCertify has the best solutions to help you make more profits through payments. Start now and scale faster at the click of a button:
